Energy in displacement settings

A brief introduction

Increasing number of displaced people around the world

102 million displaced people worldwide in 2022

- 21.7 million people forced over borders as refugees
- 52.1 million people internally displaced within their own countries
- 4.7 million are asylum seekers
- 4.7 million returnees and 4.6 million stateless people
- 14.4 million persons of concern

45.7 m
Total number of IDPs as a result of conflict and violence in 61 countries and territories as of 31 December 2019

Clean cooking access in households

Sustainable electricity access in households

- Access rates are failing in real terms
- Achieving SDG 7 in displacement contexts is further away than ever

Sustainable energy access rates are not keeping pace with the rate of displacement

Examples of energy access issues

Example: Cooking issues affecting health of women and girls

Displaced people live in **densely populated areas** with limited resources and affordability.

We advocate for **clean cooking solutions** in displacement settings

Dirty smoke from cooking in the indoor kitchen areas causes several **chronic diseases and other health issues.**

Example: Cooking issues affecting the local environment

- Loss of bio-diversity
- Conflicts with host community
- Impact on elephant population

- Landslides & accidents
- Flooding
- Hygiene problems because of spoiled groundwater

Example: Electricity access for healthcare
